in Books > Business & Money > Job Hunting & Careers > Guides #621 in Books > Audible

Audiobooks > Health, Mind & Body > Self-Help

Customer Reviews

And here's the complete observation by T.S. Eliot: "We shall not cease from exploration, and the end of all our exploring will be to arrive where we started and know the place for the first time." In the Introduction, Brian Tracy points out that "on average" people use only 2% of their mental

ability. I am among those who question that estimate as being too low but, whatever the percentage is, human mental ability tends to be underdeveloped and thus underutilized. "The natural tendency for most people is to slip into a comfort zone of easy thinking and decision-making based on old, false or incomplete thinking. Many people use far less of their mental potential because they become lazy in their thinking, jump to simple conclusions, assume causation when two events occur close together, and do what they've always done rather than to challenge the ideas [especially assumptions] or consider entirely different approaches. Years of television watching, failure to read, learn, and grow, non-stop electronic interruptions (email, social media, messaging and phone calls) make a person incapable of functioning fast and efficiently." Tracy then adds, "Your mind is like a muscle. To develop it so that it functions at a higher level, you must place demands on it, the same as lifting weights for muscle building. Get Smart shows the reader a series of simple, practical, powerful ways of questioning and examining a situation to assure the best choices and decisions. By challenging the reader to think with greater clarity, the reader challenges his/her mind and makes it stronger and more resilient " like a muscle subject to vigorous physical exercise.
