Customer Reviews

I was very excited to read Coaching Agile Teams by Lyssa Adkins. I knew Lyssa's name as one of the big names in coaching and with the raving forwards by both Mike Cohn and Jim Highsmith I had very high expectations. I am a beginning coach and this is my first book specifically geared toward coaching. My feeling after reading the book is it must be for someone who has had a couple of years experience coaching and has read some of the more "instruction" based books on the subject. There were some nuggets of good information and a very heavy emphasis on self-awareness and introspection but in general this is not the how-to book for coaching that I anticipated. The self-awareness emphasis helped me understand the importance of this subject to be a good coach but the book only touched on the subject throughout and I am left to go out and look for other resources to fill the void. This is not the type of book I was looking for or did I expect based on the table of contents. The first chapter discussed moving from positions such as ScrumMaster, Project Manager, or Tech Lead to an agile coach and contrasted some of the thinking for the different roles and how they should change during the progression. This was interesting information and useful as a checkpoint to make sure you are on the right path. Chapter two moved into expecting high performance from the team you are coaching. This is where I started to wonder if this book was right for me at my stage in coaching. Lyssa discusses the power of metaphors and introduces the High Performance Tree as a metaphor you may use with your team. The High Performance Tree has roots in Commitment, Courage, Respect, and other important Agile cornerstones. It also has fruit of Astonishing Results, The Right Business Value, and others.
