Pretty basic and generic. Unfortunate - as the premise of a book that reveals the business opportunities of the future was tantalising. Far better are "Abundance" and "Bold" by Peter Diamindis. And "Singularity is Near" by Ray Kurzweil. This reads like a bundle of blog posts by some 1st year students with no research or real experience. They should have put a brief summary of the author at beginning of each essay, instead of as an index. If you are really interested in business opportunities of the future, probably buy it to skim through but be prepared to wade through piles of obvious stuff. Or if, for example, you haven't put an iota of brainpower towards the implications of self-driving cars you might find it illuminating that they will cause traffic to flow more smoothly.

This is a dense compendium of stimulating ideas about the future. I use it as reference guide and to stimulate my thinking.

I'm one of the writers but even if I wasn't I would be very impressed by the wisdoms and foresights conveyed in this book. You will never think the same after reading this tidal wave of insights.
